

Wood-Plastic composite cutter
WD-L/BRN & WD-AL/BRN

WOODY CUTTER

MODEL	WD-L/BRN	DATE	December, 2023
PACKAGE	Blister Packed	CARD SIZE	W95xH220
BARCODE	0 91511 23096 3 		
INNER BOX	6 pcs.	100 91511 23096 0 	
MASTER CARTON	120 pcs.	500 91511 23096 8 	

MODEL	WD-AL/BRN	DATE	December, 2023
PACKAGE	Blister Packed	CARD SIZE	W95xH220
BARCODE	0 91511 23097 0 		
INNER BOX	6 pcs.	100 91511 23097 7 	
MASTER CARTON	120 pcs.	500 91511 23097 5 	

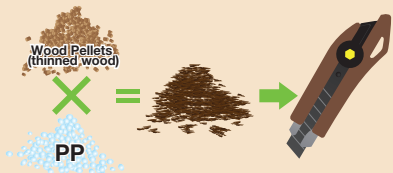

DESIGN OBJECTIVE

Natural looking wood finish handle maintains grip even with greasy or sweaty hands!
Easy to grip with the texture and feel that fit the hands like natural wood. Environmentally friendly handle made of approximately 70% wood mixed with plastic resin provides a firm grip even with oil on the hands.
* Not a substantial difference in durability and strength of the handle compared to all-plastic.

TARGET MARKET & MARKET TRENDS

Industrial Market / Mechanical Shops / Any environmentally conscious industry

Environment-Friendly Material: Biomass material uses up to 70% less plastic in the handle.
The resin used is not just regular plastic; approximately 70% wood pellet is mixed in. In addition to reducing the use of plastic, the texture of the Woody Cutter is excellent while its gripping ability is not greatly reduced by oil or liquids on the hand.

FEATURES

WD-L/BRN	100%	87%	Only 13% reduction
BN-L	100%	61%	39% reduction
