DESIGN OBJECTIVE

Metal pick has been updated for a wider range of tasks!

The L8-AL is the newest addition to OLFA's flagship X-design series. Our L8-AL features a unique cranked metal pick which offers a little extra from the popular L5-AL. The L8-AL not only can remove staples and open cans, but also be used in combination with a screwdriver as a holder for taking out loose screws that have been driven into plasterboard or other materials.

TARGET MARKET & MARKET TRENDS

Do-It-Yourself Stores / Professional Tool Shops / Industrial Supply

Increased uses of the metal pick!

L8-AL is specially designed to improve efficiency with interior work and at construction sites. Its cranked metal pick makes it easy to slide into gaps, and its unique shape helps serve as a holder for removing screws.

FEATURES

A 25% sharper edge for added initial cutting power

Good for
✓ cutting softer materials
✓ leaving clean cut surfaces

Excellent grip and durability

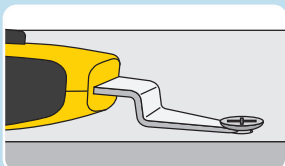

Versatile cranked Multi-Pick

OLFA X-design series

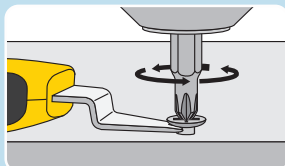

The wraparound grip is made of elastomer and glass-fiber-reinforced polypropylene for maximum handling and control.

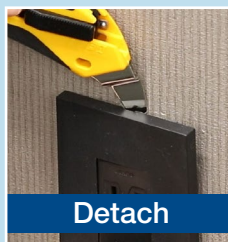

How to take out loose screws

Align metal pick under screw-head.

While holding with metal pick, turn screw with a screwdriver.
